## **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the first paragraph of 35 U.S.C. 112:
- 2. The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has provided remarks describing support for the claims. These remarks refer to original claims and sections of the Specification. It is presumed that references to original claims relate to the original claims of Serial Number 09/806,130. It is presumed that references to sections of the Specification relate to the Specification of Serial Number 10/615,731. If these presumptions are incorrect, applicant is invited to clarify the record. Reviewing the referenced original claims and referenced Specification sections, applicant's explanation for support suggests that disclosures pertaining to carbon contents of 0.15% or less would allow one of ordinary skill in the art to recognize that applicant had invented the claimed invention pertaining to carbon contents of 0.005% or less, in combination with all other claimed features. The resulting range is 3% of the original range. It

Application/Control Number: 10/615,731

Art Unit: 1775

is unclear how the referenced sections would teach one of ordinary skill in the art that this isolated narrow range was invented at the time of filing.

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
- 5. The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
  - Regarding Claims 1-6, it is unclear whether the claims demand a finite amount of carbon. The invention is described as achieving the claimed anhysteresis magnetic permeability in the presence of carbon, but it is unclear whether carbon is required.

## Conclusion

- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael La Villa whose telephone number is (571) 272-1539. The examiner can normally be reached on Tuesday, Thursday, and alternating Fridays.
- 8. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah Jones can be reached on (571) 272-1535. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
